

Sprint 1 Retrospective

What didn't go well

- Setting up the initial app took a long time
 - Getting redux up and running as well as setting up authentication (JWT) took a while to implement
 - Because of this, it detracted some of our time from working on the other tasks
 - Getting the proper APIs set up
 - Had to set up accounts for our APIs such as Sendgrid and make sure email confirmation was working

What went well

- Everyone worked on their tasks and was able to finish it in a timely manner
- Schedules were all flexible with each other so we were able to meet up anytime we needed too
- Some members had expertise with certain frameworks so everyone was able to help each other out when needed
