Task 5: Create and structure set of review endpoints (submit) (Aditya)			
Task 6: Fetch and render all the messages (John) [4]			
Task 7: Set up socket for live notifications (Aditya, Eric, John, Francisco) [5]			
Task 8: Send message via Twilio (Aditya) [6]			
Task 9: Delete and add group (John, Eric, Aditya) [7]			
Task 10: Create group schema, review schema and implement (Aditya, Eric)			
Task 11: Create cards for each house listing (John, Francisco) [8]			
Task 12: Set up search bar to query location, etc (Eric, Aditya) [9]			
Task 13: Fetch and render zillow listings (John) [10]			
Task 14: Sort and filter zillow listings (Aditya, Eric) [11]			
Task 15: Set up sharing listing with one of my groups (John, Francisco) [12]			

[1] Acceptance Criteria:

Tester: John

- 1) As a user, I should be able to go to my friends profile and write a review about that person
- 2) I should not be able to post multiple reviews about the same user

[2] Acceptance Criteria:

Tester: John, Francisco

- 1) After the review is submitted, I should be able to view the profile and see the review I wrote under the review section

[3] Acceptance:

Tester: John, Francisco

- 1) When I filter posts, I should be able to see the listings with the proper criteria for reviews (if i filter by 3 star reviews I should only see posts with users that have 3 star reviews)

[4] Acceptance Criteria:

Tester: Eric, Aditya, Francisco

- 1) When I click the group chat tab on the nav bar, it should render all the messages for the current group I'm looking at
- 2) I should be able to switch between multiple groups

[5] Acceptance Criteria

1. The socket is able to accept events and perform actions based on those events
2. The backend will signal to the front end when the action has finished and return the appropriate data

[6] Acceptance Criteria:

Tester (John, Eric, Francisco)

1. The user should receive a text message when a message is sent to the group
2. The user should be able to reply to the group via text message

[7] Acceptance Criteria:

Tester: Aditya, Francisco

- 1) There should be a button when clicked it should allow me to delete a particular group
- 2) There should be another button when clicked, I should be able to create a new group

[8] Acceptance Criteria:

Tester: Eric

- 1) When a search result is made, everything returned from the query should be rendered on card components
- 2) If no listings are found, a default card should be displayed

[9] Acceptance Criteria:

Tester: John, Francisco

- 1) When I type in anything in the search bar, the zillow api should determine what the user is searching by and return the appropriate lists

[10] Acceptance Criteria

Tester (Eric)

1. The user should see various attributes regarding the listing

[11] Acceptance Criteria:

Tester: John, Francisco

1) As a user, I want to be able to sort the listings that get returned from the query

[12] Acceptance Criteria:

Tester: Eric

1) For any listing, I am able to share the listing's information with any group chat I want to

2) In the group chat I shared to, I should be able to see all the info about the particular listing shared
